US

7 March 1997 (07.03.97) US

(71) Applicant (for all designated States except US): GENESENSE TECHNOLOGIES, INC. [CA/CA]; 100 Olivia Street, Winnipeg, Manitoba R3E 0V9 (CA).

(72) Inventors; and

(75) Inventors/Applicants (for US only): WRIGHT, Jim, A. [CA/CA]; 15 Bryn Mawr Road, Winnipeg, Manitoba R3T 3K8 (CA). YOUNG, Aiping, H. [CA/CA]; 717 Pacific Avenue, Winnipeg, Manitoba R3E 1G1 (CA).

(74) Agent: BERESKIN & PARR; 40th floor, 40 King Street West, Toronto, Ontario M5H 3Y2 (CA).

(81) Designated States: AL, AM, AT, AU, AZ, BA, BB, BG, BR, BY, CA, CH, CN, CU, CZ, DE, DK, EE, ES, FI, GB, GE, GH, HU, IL, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MD, MG, MK, MN, MW, MX, NO, NZ, PL, PT, RO, RU, SD, SE, SG, SI, SK, SL, TJ, TM, TR, TT, UA, UG, US, UZ, VN, YU, ZW, ARIPO patent (GH, KE, LS, MW, SD, SZ, UG, ZW), Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European patent (AT, BE, CH, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, ML, MR, NE, SN, TD, TG).

#### Published

With international search report.

Before the expiration of the time limit for amending the claims and to be republished in the event of the receipt of amendments.

(88) Date of publication of the international search report: 25 June 1998 (25.06.98)

(54) Title: ANTITUMOR ANTISENSE SEQUENCES DIRECTED AGAINST R1 AND R2 COMPONENTS OF RIBONUCLEOTIDE REDUCTASE

#### (57) Abstract

Compounds and methods for modulating cell proliferation, preferably inhibiting the proliferation of tumor cells are described. Compounds that may be used to modulate cell proliferation include inhibitors of ribonucleotide reductase expression, that is, inhibitors of transcription or translation of the gene encoding ribonucleotide reductase. Antisense oligonucleotides complementary to regions of ribonucleotide reductase gene are particularly useful inhibitors.

# INTERNATIONAL SEARCH REPORT

PCT/CA 97/00540

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This inte	emational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:  Remark: Although claims 19 to 25 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
2.	Claims Nos.:  because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This In	ternational Searching Authority found multiple inventions in this international application, as follows:
S	ee continuation-sheet
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. [	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  1-2,11-18 (partially) and 3-6 (completely)
Rema	The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.

### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

1. Claims: 1-2, 11-18 {partially} and 3-6 {completely}

An antisense oligonucleotide having a sequence which is complementary to a nucleic acid sequence from a ribonucleotide reductase R2 gene, pharmaceutical compositions comprising the said antisense oligonucleotide, use of the said antisense oligonucleotide to prepare a medicament, DNA sequences comprising a transcriptional initiation region and sequence encoding said antisense oligonucleotide and vectors comprising said DNA.

2. Claims: 1-2, 11-18 {partially} and 7-9 {completely}

An antisense oligonucleotide having a sequence which is complementary to a nucleic acid sequence from a ribonucleotide reductase R1 gene, pharmaceutical compositions comprising the said antisense oligonucleotide, use of the said antisense oligonucleotide to prepare a medicament, DNA sequences comprising a transcriptional initiation region and sequence encoding said antisense oligonucleotide and vectors comprising said DNA.

3. Claim: 26

A method of evaluating if a compound inhibits transcription or translation of a ribonucleotide reductase gene comprising transfecting a cell with an expression vector comprising a recombinant molecule comprising a nucleic acid sequence encoding a ribonucleotide reductase and the necessary elements for the transcritpion or translation of the nucleic acid.

4. Claim: 27

Method of evaluating a compound for its ability to regulate a Ras signalling pathway by assaying for an agonist or antagonist of the interaction of R2 and Raf-1 and/or Rac-1.
